

receiving instructions from a user to provide a ticket for an event across a computer network;

selling the ticket to the user across the computer network in response to the instructions; and

instructing the user's printer to print the ticket onto a media having a plurality of ticket printing areas each defined on at least one edge by a line of weakness, such that the ticket is printed on at least one of the printing areas for subsequent separation from the media along at least the line of weakness.

A1 cont
81. The method of claim 80, wherein the instructing further includes at least one additional pre-defined printing area for printing additional information relating to the event for which the ticket is printed, and an additional printing area removable from the pre-defined ticket printing when the ticket is presented for admittance to an event.

82. The method of claim 80, further comprising instructing the user's printer to print tickets of different sizes and for different events in the plurality of ticket printing areas on the media.

83. A media for printing a ticket for admittance to an event with a printer, the media comprising:

a sheet having a plurality of pre-defined ticket printing areas each having a line of weakness along at least one edge for separation from the media, the plurality of pre-defined ticket printing areas for printing at least one ticket from the printer, wherein each pre-defined ticket printing area includes an additional printing area removable from the pre-defined ticket printing area when the ticket is presented for admittance to an event;

at least one additional pre-defined printing area on the sheet for printing additional information relating to the event for which a ticket is printed; and

at least one area on each pre-defined ticket printing area for printing security information identifying the holder of the at least one ticket.

84. The media of claim 83, wherein the security information includes a bar code.

85. The media of claim 83, wherein the security information includes an identification sequence.

86. The media of claim 83, wherein the sheet is arranged to include four pre-defined ticket printing areas each having a removable additional printing area and an additional pre-defined area for printing additional information.

87. The media of claim 86, wherein the four pre-defined ticket printing areas are of equal size.

88. The media of claim 86, wherein each of the four pre-defined ticket printing areas includes at least one area on each pre-defined ticket printing area for printing security information identifying the holder of the at least one ticket.

89. The media of claim 83, wherein the sheet is arranged to include four pre-defined ticket printing areas each having an removable additional printing area, and three additional pre-defined areas for printing additional information.

90. The media of claim 89, wherein the four pre-defined ticket printing areas are of equal size, and the three additional pre-defined areas for printing additional information are of equal size different than the size for each pre-defined ticket printing area.

91. The media of claim 89, wherein the four pre-defined ticket printing areas are of equal size, and the three additional pre-defined areas for printing additional information are of varying size, wherein the sizes of the three additional pre-defined areas for printing additional information are not the same as the size of the pre-defined ticket printing areas.

92. The media of claim 89, wherein each of the four pre-defined ticket printing areas includes at least one area on each pre-defined ticket printing area for printing security information identifying the holder of the at least one ticket.

A1 cont
93. The media of claim 92, wherein the three additional pre-defined areas for printing additional information include an area for directions, and area for a floor plan, and an area for a food coupon.

94. The media of claim 92, wherein the three additional pre-defined areas for printing additional information include an area for directions, and area for a concession coupon, and an area for a card with a removable label.

95. The media of claim 92, wherein the three additional pre-defined areas for printing additional information include an area for directions, and area for a food coupon, and an area for a merchandise coupon.

96. The media of claim 92, wherein the sheet is arranged to include four pre-defined ticket printing areas, each having an removable additional printing area, and four additional pre-defined areas for printing coupons, wherein two of the coupons include removable additional printing areas.
